

Meet the award-winning industry standard
for cataloging and editing AACR2 MARC records...

The perfect companion
to your existing library
automation system.*

Powerful tools make a powerful impact on your work and Mitinet's cataloging software program, **MARC Magician™**, is one of the most powerful tools on the market today for AACR2 MARC record creation and maintenance.*

We know that's a big statement to make, and we can back it up.

Just some of the benefits of **MARC Magician™**:

➤ **Edit Your Data Faster**

- Set up the fields you want to edit in a few steps with **Global Editing**, and let **MARC Magician™** do the rest.
- Context-sensitive help screens help you create records according to AACR2 standards.
- Customizable templates make standardizing records easy.

➤ **Find & Fix Errors Easier**

Use our customizable **Active Error Checking** to find missing information, punctuation & non-filing indicators, and other common errors. Record errors are clearly flagged and **MARC Magician™** even points out the error type, saving you time in correction.

➤ **Get Help When You Need It**

Get extensive after-sales support free. Real people answer your phone calls or email and we make sure you have what you need to get the most out of our products. We are confident in the quality of our product, but we also excel in the quality of our service, should you ever need help.

*Please note: MARC Magician Professional is not compatible with RDA cataloging rules. If you require RDA compliant records, please contact us about using BestMARC™, our online service with MARC record search and cataloging capabilities.
